

FOREST MULCH TECHNICAL DATA SHEET

DESCRIPTION: Earthborn Forest Mulch is economical mulch which is ideal for broad acre and bush regeneration applications. This mulch contains fine to coarse organics which will break down at varying rates over a long period of time.

PROPERTIES:

- Superior moisture retention characteristics to increase water holding capacity in sandy soils to prevent drying and cracking
- Acts as a soil conditioner by promoting increased microbial and earthworm activity
- Ideal for weed suppression and regulating soil temperatures in all garden applications

APPLICATION:

- Acts as a soil conditioner and rejuvenator for damaged soils
- For optimum results spread to a depth of 4 inches and reapply every 24-36 months
